EDUCATION

East China Normal University

B.S. in Computer Science *GPA: 3.82 (Current)*

Shanghai, China

Sep 2024 - Jun 2028 (Expected)

SKILLS

Programming Languages:	C++, Python, HTML, HLSL, JavaScript, Unity Shader Language
Development Tools:	Git, LaTeX, PyTorch
Game Engines & 3D Software:	OpenGL, Unity, Blender
Front-end Development:	React, npm, JSX, HTML5, jQuery

PROFILE

Junior student majoring in Computer Science and Technology at East China Normal University. Experienced with 3D software and APIs such as Blender and Unity, with a solid grasp of deep learning and computer graphics. For personal projects, please visit my GitHub profile: <https://github.com/ECNUjohnny>

PROJECTS

Personal Game Project *Unity, Blender, CSharp*

A personal 3D game project inspired by Red Dead Redemption 2. Currently features a basic building biome and an NPC system.

GitHub: <https://github.com/ECNUjohnny/Game-Project>

Text-to-Fluid: Semantic Authoring of Fluid Simulation via Large Language Models *Unity, Unity Shader Language, C++*

This project aims to utilize large language models to analyze user's emotional input and dynamically adjust the stylized SPH fluid in Unity to visualize the emotion.

Implemented a toon-shaded SPH fluid renderer in Unity and integrated an LLM to dynamically map rendering functions and parameters based on the user's natural language input.

Text-Driven Stylized Terrain Generation *Python, PyTorch, CDSE API*

Developed a deep learning framework based on Variational Autoencoders (VAE) to generate stylized heightmaps. Integrated the Copernicus Data Space Ecosystem (CDSE) API for automated acquisition and processing of global terrain data.

GitHub: <https://github.com/ECNUjohnny/llm-style-terrain-joint>

Medical Institution Data Visualization *React, JavaScript, JSX*

Course project for Data Visualization. Developed a web application using the React framework to visualize the distribution of medical institutions and provide additional features such as heatmaps, administrative district statistical histograms, and shortest path search.

GitHub: <https://github.com/ECNUjohnny/hospital-dataviz>

RESEARCH EXPERIENCE

Text-to-Fluid: Semantic Authoring of Fluid Simulation via Large Language Models *International Conference on Computer-Aided Design and Computer Graphics (CAD/Graphics)*

Xubin Du, Juanjie Luo, Changbo Wang, Chenhui Li, Junyan Zhou, Nan Xiang

Text-Driven Joint Generation of Terrain Geometry and Texture in a Shared Latent Space *IEEE VR (Under Review)*

Junyan Zhou, Yunze Han, Haizhou Zhu, Chenhui Li

HONORS & AWARDS

Lanqiao Cup National Software and Information Technology Professionals Competition *Ministry of Industry and Information Technology*

First Prize, Shanghai Provincial

Apr 2026

Lanqiao Cup National Software and Information Technology Professionals Competition *Ministry of Industry and Information Technology*

Third Prize, National Final

Jun 2026

Chinese Mathematics Competitions (CMC)

First Prize, Shanghai Provincial

Chinese Mathematical Society

Dec 2025

IELTS Academic

Overall Band Score: 7.5 (Reading: 9.0, Listening: 8.5, Speaking: 6.5, Writing: 6.5)

IELTS British Council

Jul 2026
